WORKS IN PROGRESS

Zombie Legal Reform?: Judicial and Administrative Law Development in China under Xi Jinping – Evaluates judicial and administrative law reform in China since the so-called “rule of law” plenum of the 18th Party Congress in 2014, with special consideration given to the impact of top-down political mobilization, the role of legal professionals, and the nature of legal culture.

At the Boundaries of Authoritarian Legality: Revision of China’s Administrative Litigation Law – Evaluates the 2014 and 2017 revisions of the *Administrative Litigation Law*, and subsequent implementation of those changes, as a particularly illuminating case study for understanding the possibilities and limits of “authoritarian legality” in China.

Participation and Accountability in Chinese Administrative Procedure – Examines how many of the procedural rules and accompanying bureaucratic practices associated with U.S. administrative law have been advanced under national and local regulations in China, with special attention to the question of how such rules and practices can reasonably operate in a non-democratic setting.

Suing the Government in China – Considers the impact of lawsuits against Chinese government entities, over the ~35 years since the passage of China’s *Administrative Litigation Law*, in three different respects: as a mechanism for strengthening the application of state law to government action, as a site of autonomous legal development, and as a potential source for political reform.
